

I am outraged. You are investigating the Super Bowl incident regarding Ms. Jackson. However, I have DSL service to my home via Starpower and when I try to turn my computer off, obscene porno movies come on the screen, I have children and we work on the computer together, I find this repulsive. How do you explain this to a child? In the ongoing discussion re cable and DSL, efforts should be made to block this kind of pornography from coming into a faith filled home. Thank you.
